PROFILE SUMMARY

To leverage my engineering background and growing expertise in software development, Python, and machine learning to transition into a software role that values analytical thinking, clean coding practices, and continuous learning while contributing to the development of scalable and efficient software solutions. I seek an environment that encourages learning, problem-solving, and long-term professional growth.

EDUCATION

Central University of Jammu, J&K	2022 - 2026
B.Tech in Electronics and Communication Engineering (ECE), Specialization: Avionics	CGPA – 7.3

TECHNICAL SKILLS

Programming: Java.
Web Technologies: HTML, CSS, JavaScript (basics).
Database: MySQL.

ACADEMIC PROJECTS

Solar & Wind-Powered EV Charging System

- Designed a hybrid EV charging station powered by renewable energy (solar + wind).
- Implemented converters, charge controllers, and embedded controllers.
- Integrated real-time monitoring and load balancing for reliability.

Nexus Flow (A smart task Dashboard)

- Developed "NexusFlow," a smart task management dashboard using HTML, CSS, JavaScript, and localStorage.
- Implemented CRUD operations for creating, updating, deleting, and managing tasks efficiently.
- Added dynamic search, filter, and task status features to improve workflow organization.
- Designed a responsive and user-friendly interface compatible with desktop and mobile devices.
- Utilized JavaScript for DOM manipulation, event handling, and data persistence to enhance user experience.

INTERNSHIP

Garuda Aerospace

Research & Development (R&D) Intern	May – Jul 2024
- Collaborated on innovative drone technology projects with the global R&D team. - Designed and optimized drone solutions for agriculture, defense, and industries. - Contributed to product testing and performance improvements. - Assisted in developing new UAV prototypes for global applications.	

SOFT SKILLS

- Problem-Solving.
- Time Management.
- Quick Learning Ability.
- Self-Motivation.
